Truck Etape Béziers

TRUCK ETAPE BEZIERS is ideally placed 800m away from A9's Exit 36, 130 km away from La Jonquera.

It offers a 350 places, entirely fenced, Secure Parking Lot under video and human surveillance around the clock, a restaurant and a gas station for trucks.

SECURE PARKING

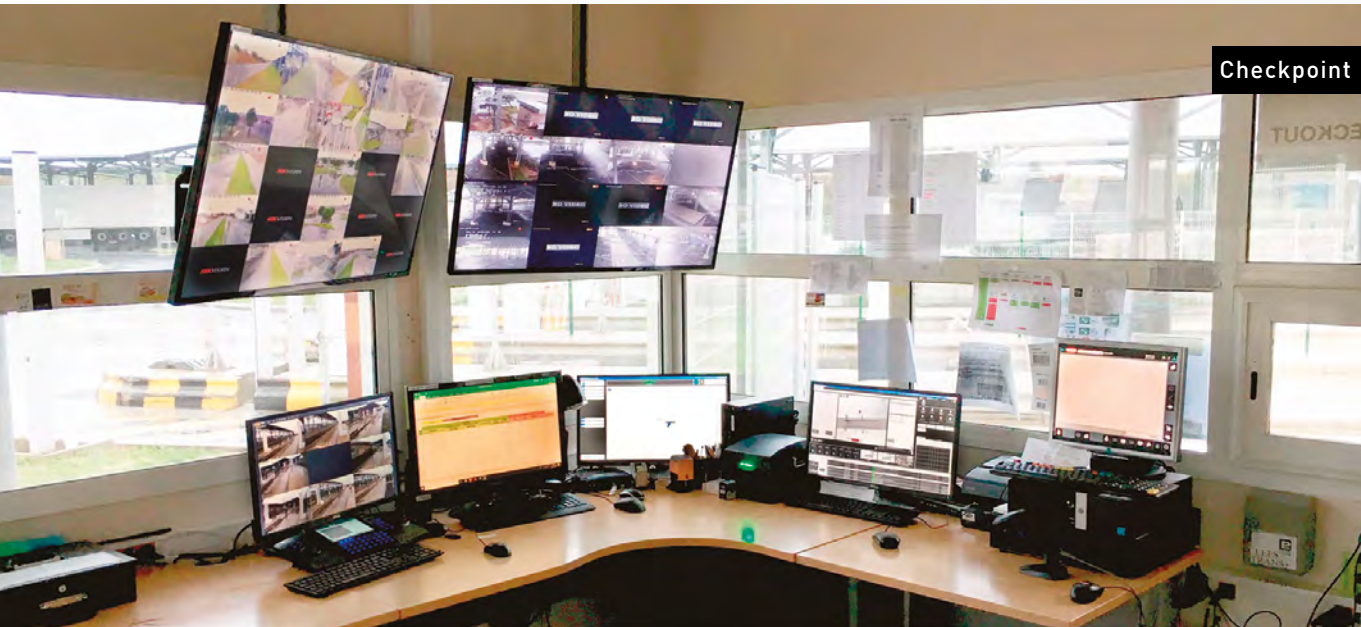

Manned around the clock, 7 days a week

TRUCK ETAPE BEZIERS and G SECURITE's teams keep watch around the clock, enforcing optimal security control around the clock, 7 days a week. Regular rounds and high intensity nocturnal lighting allow complete visibility over the site's 350 parking spots.

CCTV

- 4-lane-access video-monitoring. Pictures taken from every side of the truck.
- Collection of front and rear license plates.
- Pedestrian access monitoring.

IN DEPTH CHECK OF TRUCK & DRIVER

TRUCK ACCESS MONITORING

2 entry lanes and 2 exit lanes make for a perfect flux management. Going in, every driver collects a ticket. Simultaneously license plates are recorded and linked to the ticket within the security system. 4 perimeter photos are automatically taken for every truck going in.

To exit the parking lot, drivers must scan their ticket – both ticket and front and rear license plates are checked against entrance data. 4 perimeter photos are automatically taken again.

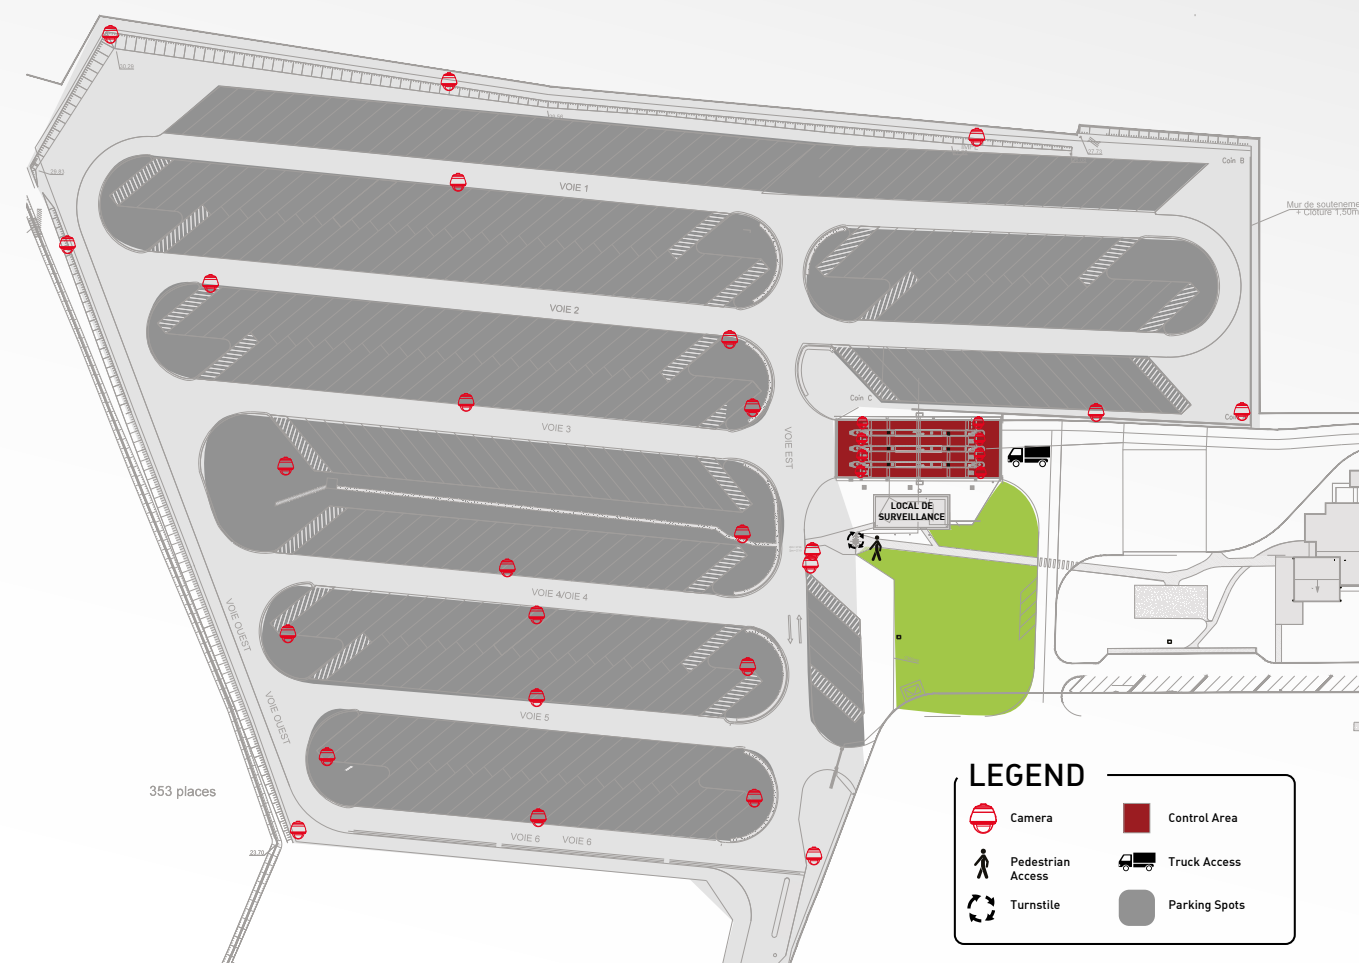

PEDESTRIAN ACCESS MONITORING

Pedestrians may only exit through 2 turnstiles – unlocked by scanning the entrance ticket only.

SECURE PARKING UNDER CCTV

- 18 IP HIK Vision HD domed cameras, 360° and infrared view ensure **fenced perimeter protection**.
- 14 analogic domed cameras track every movement on **the driving lanes**.
- 8 IP Bosch HD fixed cameras automatically photograph every in-bound and out-bound truck.
- IP Bosh HD fixed cameras for ANPR (Automatic Number Plate Reading) for **in-bound and out-bound trucks**.

HIGH INTENSITY LIGHTING

- Compliance with the **European Commission's** requirement for a minimum lighting power of 20 lux.

ELECTRICAL POWER SUPPLY FOR REFRIGERATED TRAILERS

10 power supply sources are available for refrigerated trailers.

When switching to electricity a cost reduction of 65% per operating hour is achieved.

The use of locally produced green electricity (available from on site photovoltaic panels) allows for carbon footprint reduction.

Electrical Power Consumption vs Diesel Consumption for 8 hours run-time

ENERGY SOURCE	CONSUMPTION	COST
DIESEL	3 L / h, 24L for 8 hours	22 €
ELECTRICITY	6 kW/ h, 48 kW	8 €

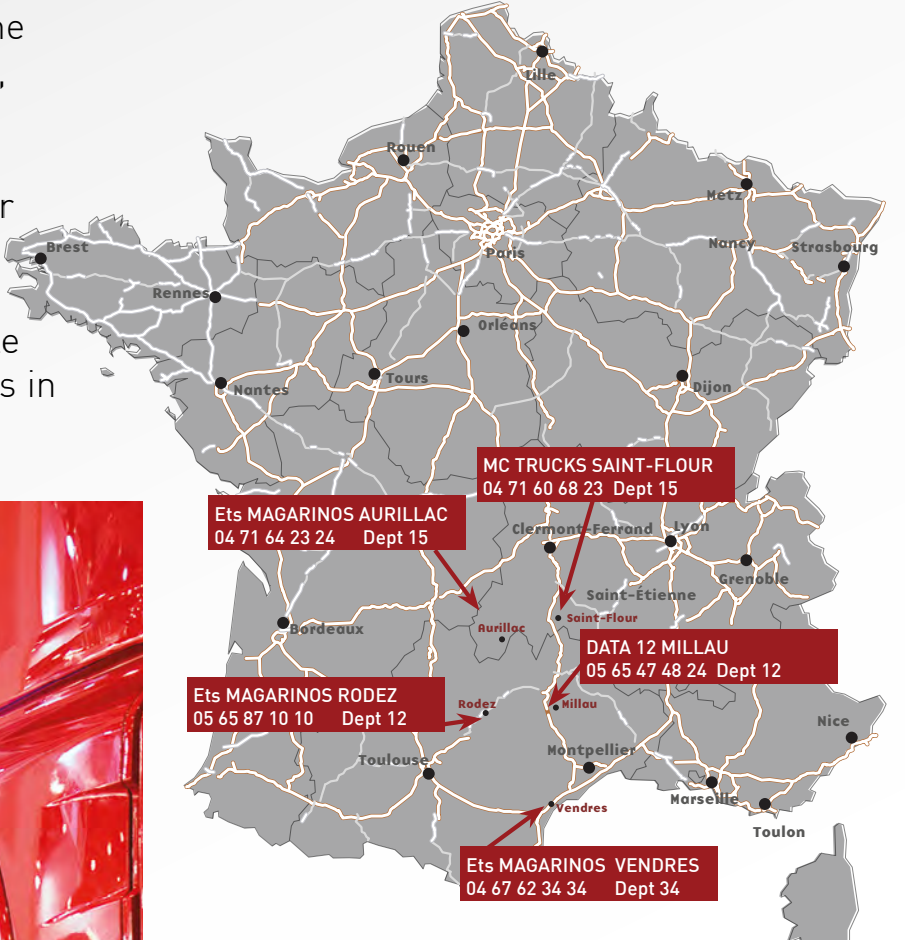

Electrical Power Consumption freely gifted until 31.12.2019

MAN

The MAGARINOS facilities, the neighboring MAN dealership, provide servicing and repairs for all truck makes and models from their Via Europa Ouest Garage.

Their teams are also available 24 hours a day in 4 more sites in Southern France.

NEW

HOTEL ROOM BOOKING SERVICE

To abide with European Parliament directives ruling drivers must have their weekly pause off-truck, we help drivers finding available hotel rooms for 1 or 2 persons in a 5 km radius.
